

Spring Boot Asssement: DevSkiller Learner Guide

This guide explains how to take the DevSkiller test once you receive the invitation email.

1. Check Your Email Quarantine (Bulk Digest)

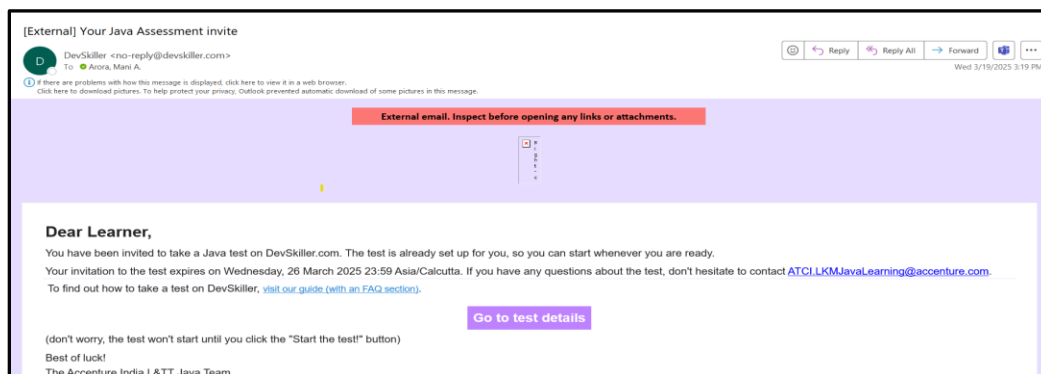

Before you receive the DevSkiller invite, check your daily **Bulk Email Digest** for quarantined messages.

- Look for emails from: **no-reply@devskiller.com**
- Click **“Release and Allow Sender”** to start receiving DevSkiller emails in your inbox.
- Without this, invites and results may be blocked

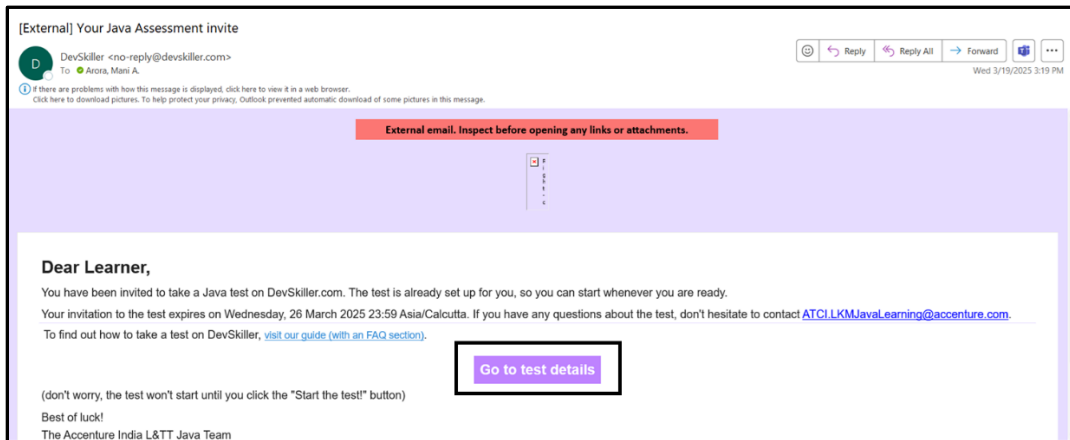

2 . Receiving the Invitation Email

- The DevSkiller invitation email will come from **no-reply@devskiller.com**
- The subject line: **[External] Your Java Assessment Invite**

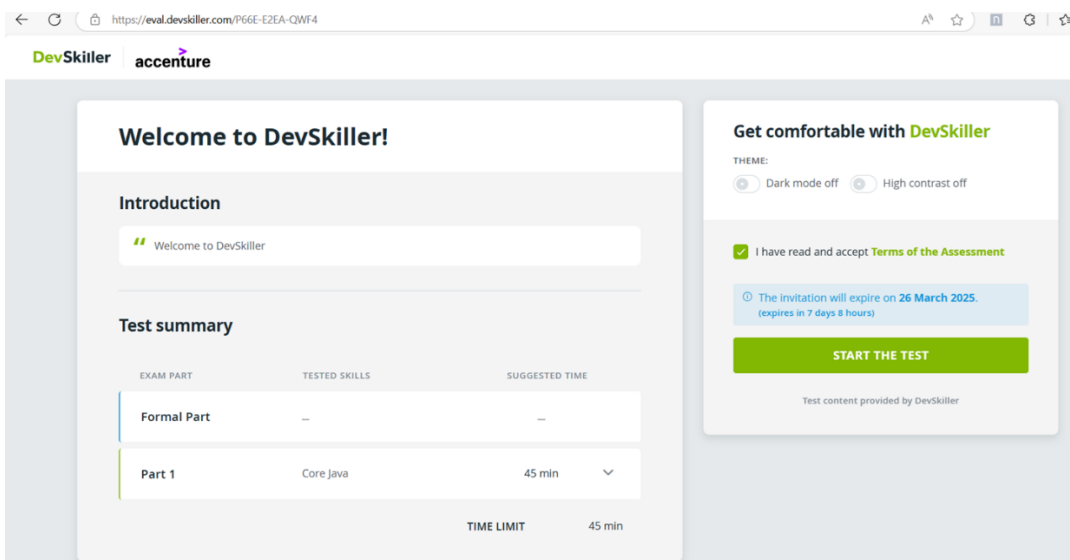

3. Accessing the Test

- The email contains a **“Go to test details”** button.
- Click this button or link to open DevSkiller in your web browser.

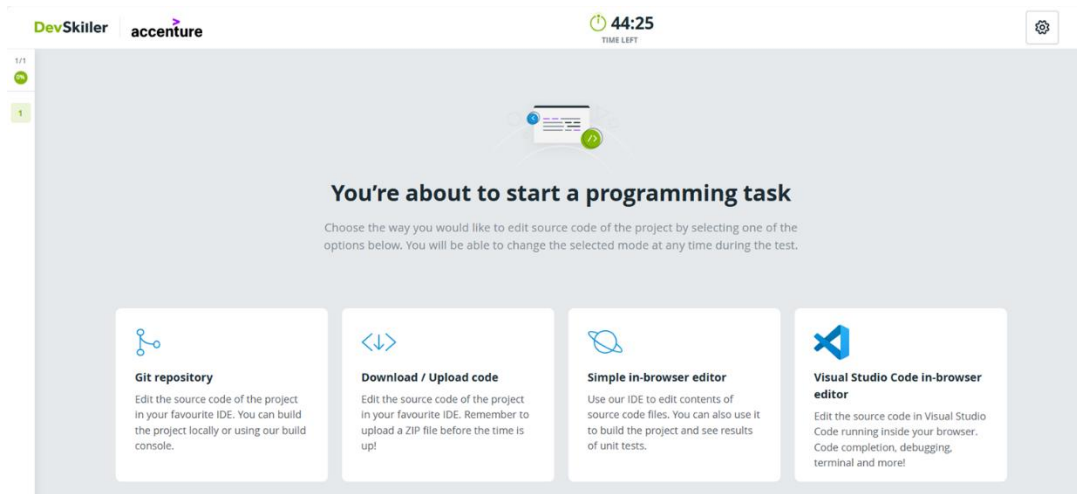

4. Welcome Screen

- Open the link provided.
- You will land on a welcome screen like the screenshot below.
- Select the checkbox to confirm that you have read and accepted the terms of the assessment.
- Click "**Start the Test**" to begin.

5. Choosing Your Programming Environment

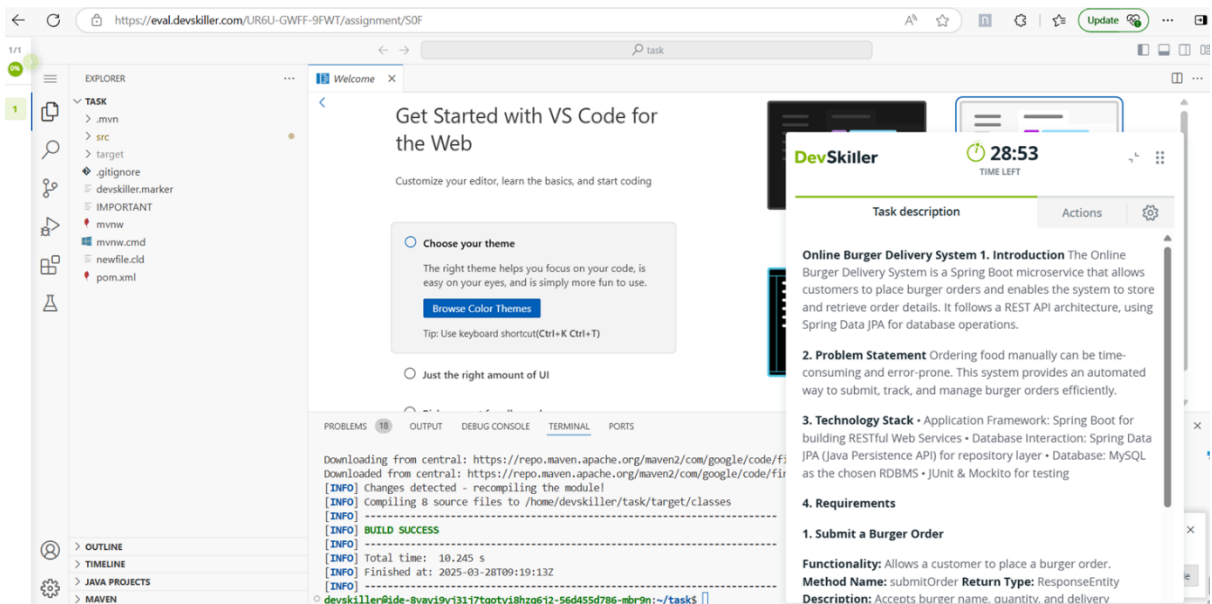

- Click **"Start the Test."**
- You will see a screen outlining different ways to work on your programming task.
- From the environment selection screen, choose **"Visual Studio Code In-Browser Editor."**

6. Understanding the DevSkiller Interface

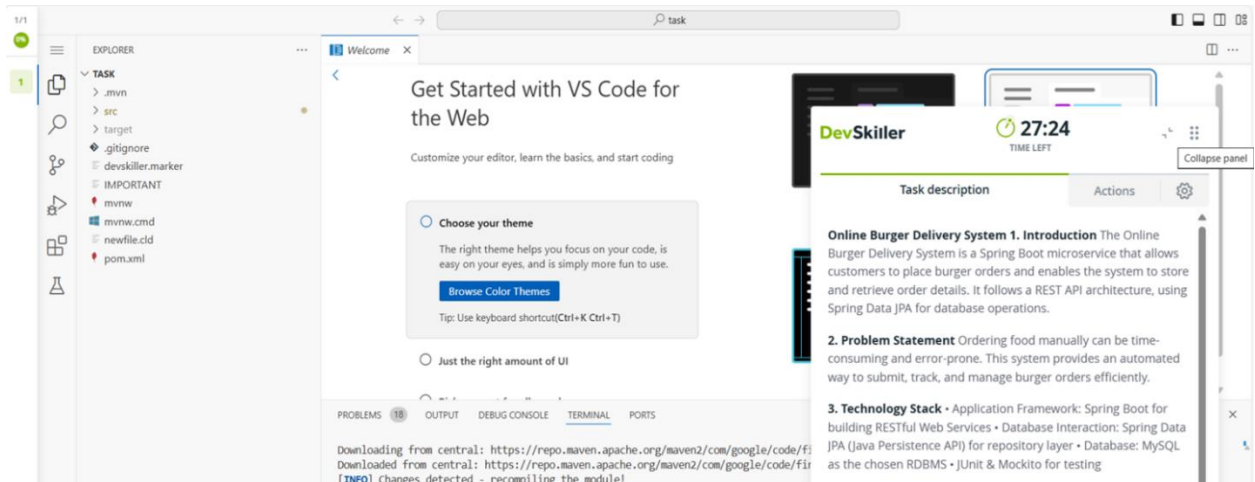

Once you have selected **"Visual Studio Code In-Browser Editor"**, you will see the following interface:

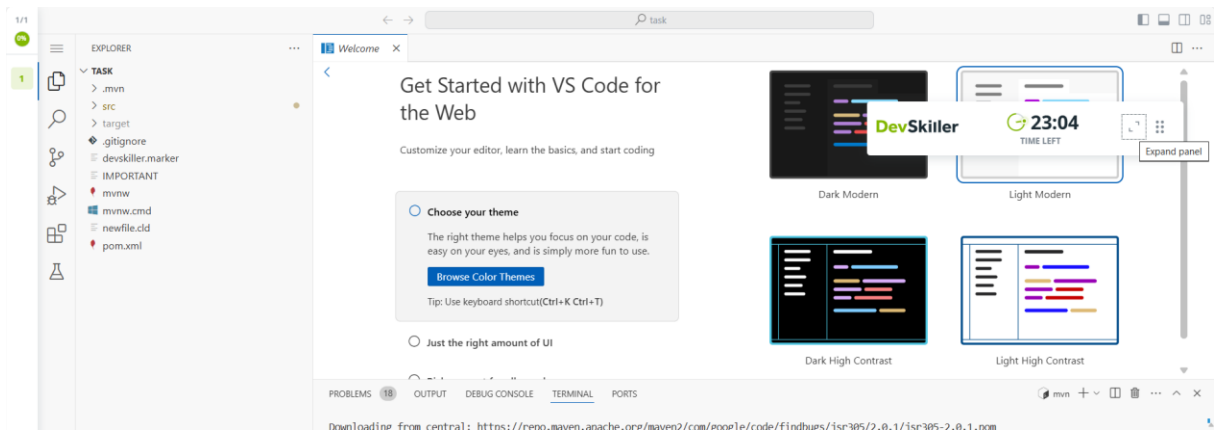

- **Explorer Panel (Left):** Displays the project folder structure, including:
 - **src/** – Contains source code for implementing logic.
 - **pom.xml** – Maven configuration file for dependencies and build setup.
 - **README.md** – Task instructions and guidelines.
- **Editor Area (Center):** Where you write and modify Java code.
- **Task Description Panel (Right):** Provides assignment details, requirements, and rules.
- **Terminal (Bottom):** Used for running Maven commands to build and test your code.

7. Collapsing the Task Description Panel

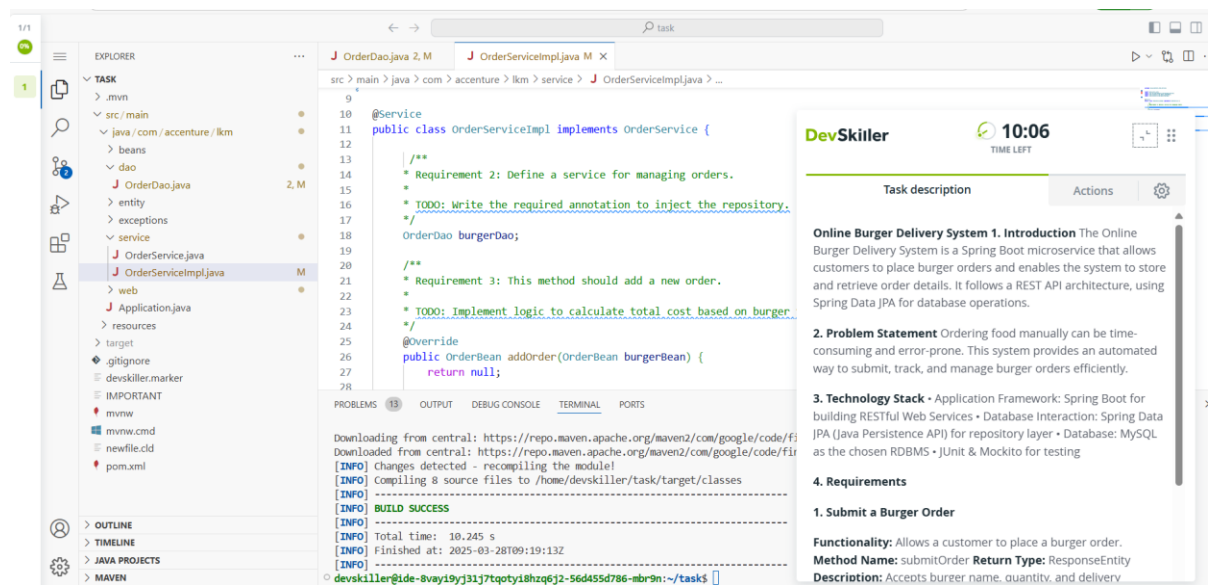

Collapse the task description panel on the right to free up space for coding. Expand it anytime to read the instructions.

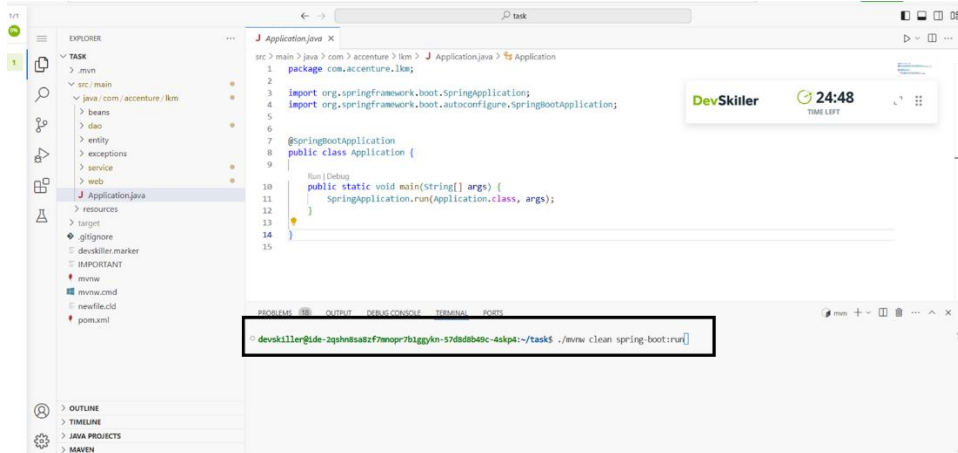

8. Implementing the To-Do List

Start coding by completing the **TODO** tasks mentioned in the files.

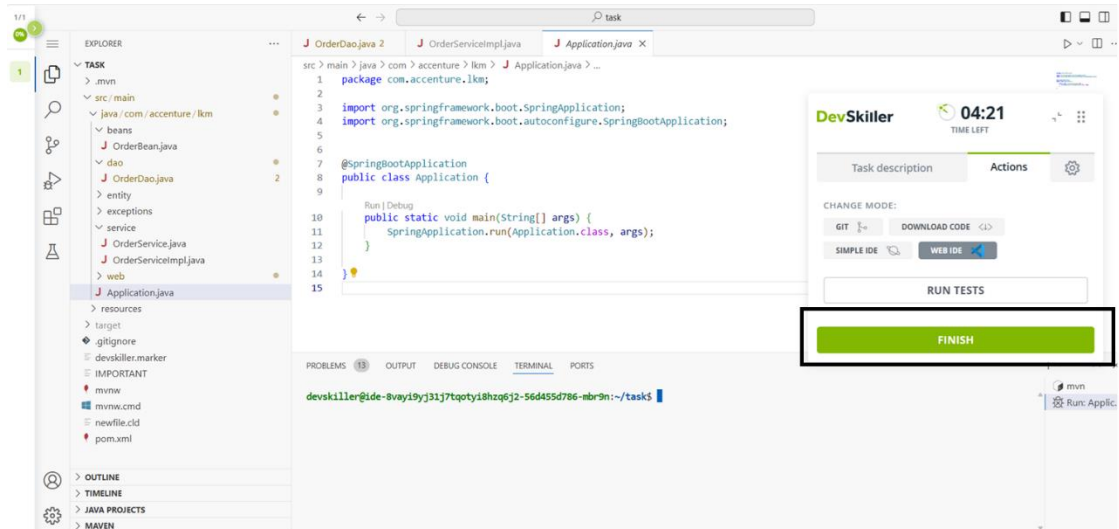

9. Running the Application

After completing the code, run the application using command
./mvnw clean spring-boot:run

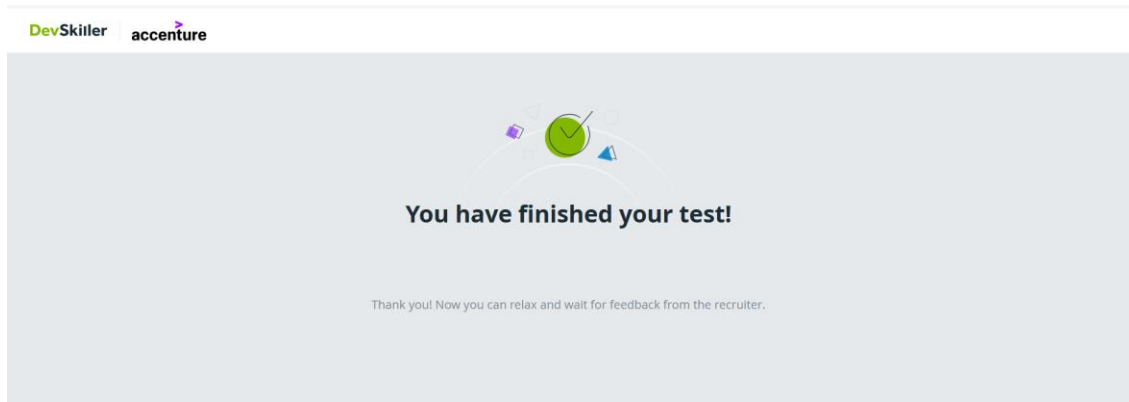

10. Submitting the Test

Click on the **Actions** tab, then click the **Finish** button to submit the test.

After submitting, you will see a confirmation message:
"You have finished your test!"

11. Receiving the Test Completion Email

After submitting the test, you will receive an **automated email** confirming that the test is completed along with your **score details**.
